with a cost-effective SaaS solution

a a g a w k a for higher process efficiency and user productivity

a g a with standard interfaces and productized SAP integration

E a a g with encryption and storage in regional data centers

Core Archive for SAP Solutions is an archiving service in the cloud for both SAP and non-SAP content, helping organizations manage the explosion of content, while ensuring it is cost-effectively and securely stored in the cloud.

As a Software as a Service (SaaS) solution, Core Archive for SAP Solutions sidesteps the complexity of setting up an on-premises enterprise archiving infrastructure for different lead applications and content types. This greatly

O

Customers can leverage a multi-tenant environment managed by experts for cost effectiveness without compromising security or scalability. And, with the consumption- based license model, customers only pay for what they consume, while still having the option to expand the service alongside their growing needs.

Paper handling inefficiencies are now a thing of the past as the solution can digitize all incoming paper documents, as well as entire paper archives. Core Archive for SAP Solutions manages all electronic content, such as email, office documents or SAP-generated outgoing documents, and integrates the content with SAP processes.

SAP users can seamlessly access content inside the SAP UI, via SAP standard, enhanced attachment lists or easy to use business process views and SAP Fiori® apps. Customers gain higher process efficiency and user productivity.

The solution is certified by SAP to be SAP ArchiveLink® compliant, supports the SAP WebDA...
