

OpenText Brava! Enterprise

Securely view, annotate, redact, and transform any file on any device

Securely view, annotate, redact, and transform files on any device

Accelerate reviews and approvals

Publish files securely to TIFF and PDF

View files of any type including 2D and 3D designs

OpenText™ Brava!™ Enterprise is the ultimate solution for securely viewing, annotating, redacting, and transforming any file. With Brava!, organizations can remove sensitive information, accelerate reviews and approvals, and publish files securely to TIFF and PDF.

Securely view, annotate, redact and transform files on any device

Remove sensitive information through automatic redaction with pattern matching and text search and manual redaction with area selection tools.

This list represents the current known, tested formats supported by Brava! Enterprise. Brava! uses 64-bit technology and typically supports any format with access to a Microsoft® Windows®-based application that supports the print canonical verb. Linux® Publishing Agent compatibility is noted where applicable.

Please contact us with any format questions.
