Your vision for business improvements delivered

Streamline your business processes

with user friendly portals

Realize a significant return on investment and cost-savings with powerful built-in reporting and analytics

Substantially reduce your risk

Deploy with built-in automation

OpenText™ Business Process Management (BPM) is a comprehensive suite of tools that enables organizations to streamline their business processes, reduce risk, and improve efficiency. The suite includes a range of capabilities, from process discovery and design to deployment and optimization. OpenText™ BPM is designed to be easy to use and integrate with existing systems, making it a powerful tool for organizations of all sizes.

Every business process has a lifecycle, from discovery of the need to create or change a process through deploying, managing, and optimizing the process as requirements evolve. OpenText™ MBPM™ provides everything the enterprise needs
