

DATA SHEET

OpenText Intelligent Capture

Transforms all paper and electronic documents into business ready content, scaling to meet any requirement

Offers an **end-to-end** capture solution

Harnesses the power of **advanced recognition**

Includes **automated data extraction/OCR**

Associated OpenText products

- **OpenText™ Content Server**
- **OpenText™ Documentum™**
- **OpenText™ Magellan™**

By supporting organizations in their goal to automate and reduce the time and expense of manual document sorting and data entry, OpenText™ Intelligent Capture saves money and improves business processes. It provides a flexible, end

Feature name	Description
Mobile capture enablement	Offers on-device image capture and clean-up, server-side RESTful services and mobile image enhancement filters and quickly converts any camera-equipped mobile device into a powerful tool to capture information at the point of contact
Real-Time Capture Services	Provides REST-based services designed to meet the emerging needs of mobile and line-of-business applications that use the full power of Intelligent Capture to quickly get content into a business process

Offers an end-to-end capture solution

Intelligent Capture interfaces with hundreds of scanners, leveraging image and scanner interface specification technology, and works with multi function peripheral devices and network scanners for distributed capture environments. It can also capture documents from emails, network folders and other sources, providing organizations with many document input options for paper and electronic formats. Thirteen of the world's top 25 banks rely on this highly configurable platform, which scales to handle

Advanced recognition capabilities ensure a fast return on investment. More than 90 percent of customers reported a positive ROI within 2 months and 82 percent within 3 months. Intelligent Capture's automated document classification and data extraction for structured and unstructured documents drive these compelling, industry-leading results.

Automated document and data classification

Includes automated data extraction/OCR

Intelligent Capture provides out-of-the-box, key features such as image indexing support, zonal OCR, OCR rubber banding for quick document data extraction and indexing. Extended modules offer fully automated extraction and validation, leveraging multiple technologies, including OCR, ICR, OMR, barcode recognition and routing algorithms to automatically extract data from documents. With full automation through advanced recognition, classification and extraction can be extended to include free-form data extraction from unstructured documents.
