It provides a comprehensive view of your data, allowing you to identify trends and opportunities. OpenText Lens is designed to help you achieve your business goals and improve your customer experience. It is a powerful tool that can help you understand your data and make it available to the right people at the right time.

Payload encryption and viewing

Encrypts sensitive payload data and makes non-sensitive payloads available to help monitor and analyze business processes

Benefits

Increase end-to-end data visibility

Gain a comprehensive view of data across the entire organization, from source to destination, to identify data quality issues and optimize data flow.

Improve business agility

Respond quickly to changing market conditions and customer needs by leveraging real-time data insights to inform business decisions.

Unify data visibility

Break down data silos and create a single source of truth for all data, enabling consistent reporting and analysis across the organization.

Empower more users with insights

Provide self-service data access and analytics tools to empower business users and drive data-driven decision-making.
