High Availability and Scalability

- Off-site (inter-system) replication for business continuity and disaster recovery (must be peered with an SP edition server)
 - MySQL Database scalable to millions of inbound/outbound faxes with easy archiving
 - Virtualization ready for enhanced system availability and resources
-

Faxing to remote printers

- SMTP: For any printer configured to receive print jobs (with either TIFF or PDF attachments) via an email address
- HP® ePrint: For internet printers compatible with the HP ePrint service (receiving print jobs via their email address)
- Xerox® Mobile Print: For internet printers compatible with the Xerox Mobile Print service (receiving print jobs via their email address)
- Google® Cloud Print: For internet printers compatible with the Google® Cloud Print service (either natively or using the Google Cloud Print connector)

Hardcopy faxing (MFPs)

Platform-specific - via OpenText connectors/apps

- Xerox EIP® 2.0 and +
 - Xerox ConnectKey®
