

# Top Mobile Communications Risks and Concerns for Legal Organizations

Employees are using mobile devices to communicate in new and innovative ways that can substantially increase the risk of data loss, data leakage, and data theft. This risk is compounded by the fact that mobile devices are often used to access sensitive information, such as client data, financial records, and confidential information. The following are some of the top mobile communications risks and concerns for legal organizations:

## Retain Archives Mobile Communication Data for:

- v iOS (with integration with CellTrust SecureLine, providing dual persona)
- v Android
- v BlackBerry

Retain Mobile archives text messages, multi-media messages, secure messages, phone call logs, PIN, BBM, and BBM Enterprise messages in one central archive. In addition to mobile, Retain archives multi-platform email communication data.

“Retain put eDiscovery [by NetIQ] responsibilities directly into the hands of Health First’s legal team. Retain lifted a huge burden from the legal team.”

DANIEL BRAY  
System Operation Analyst  
Health First

Some of these risks include:

- v Sexual harassment
- v Financial loss
- v Data leakage
- v Discrimination
- v Loss of productivity
- v Potential litigation

## Regulations

As regulations become highly regulated, firms are now compelled to not only be conversant with archiving and discovery laws but also to be compliant as well. A sampling of the regulations and guidelines for archiving and retaining electronic communication are listed below. Compliance with these regulations will help your organization avoid the risks involved with email,

also features policy-based mobile call recording and archiving. Retain is the only enterprise-ready archiving solution for iOS, Android, and BlackBerry devices.

With Retain Mobile you don't lose valuable information and your organization stays compliant. Your sensitive data stays secure and you don't lose it. (T) (f) 25 (i) 0.5 (and) 15 (y) 12nd BlackBerry devices 9
