

A new integration extends UFT Digital Lab's many deployment options and enables you to test on devices hosted for you by Tencent WeTest. For details, see [Connect a Tencent WeTest device](#).

UFT Digital Lab now includes two additional device widgets that show the distribution of devices by manufacturer and model. These widgets provide more in-depth information about the devices in the lab. This information can assist decision making regarding what additional devices or models to purchase, or which models to assign t
